

## **RESEARCH FOCUS IN LIVESTOCK SCIENCE AND SUSTAINABLE ENVIRONMENT**

Currently, the Livestock Science and Sustainable Environment Programme is researching a variety of projects that cover issues such as animal biotechnology, genomics, Animal welfare, feed science and feed safety, as well as projects focusing on the major livestock species in Nigeria including poultry and small ruminant. Our research programmes focus on applied Animal science, which has an immediate application to Nigeria animal agriculture, and basic science, which provides the foundation for scientific information to impact further research discoveries.
